

I'm Ioannis, a founder now studying in the Product Manager programme at Hyper Island, after thirteen years of making complex services *work*.

Across Swedish healthcare and personal assistance, I connected procurement, people, operations, quality, and daily delivery.

NOW & BEFORE

Now	Hyper Island ● Product Manager programme
2012 to 2025	Konduko AB Founder & CEO
2011 to now	NiyaCare Founder
1998 to 2011	Visual communication Design, projects & client work

SELECTED WORK

Products made by asking better questions.

Agent X

UX RESEARCH · CONCEPT · 2026

A diegetic companion for new Escape from Tarkov players, shaped through eight interviews, a research matrix, and four wireframe views.

Scribe

MACOS · WORKING APP · 2026

A meeting recorder that keeps processing local. It was built through specifications, AI agents, and manual verification. Even so, 283 passing tests missed four real defects.

Radio

IOS · WORKING BUILD · 2026

An internet radio player scoped, built, independently audited, and installed on a physical phone in one working day.

HOW I WORK

Clarity before polish.

Research before certainty

In Agent X, interviews, synthesis, journey mapping, wireframes, and think aloud testing replaced assumptions with something observable.

Comfort with complexity

Thirteen years in a regulated service business taught me to connect requirements, operations, stakeholders, and incomplete information.

Verification over theatre

I use AI tools every day and assume plausible output still needs checking. The audit is part of the product work.

User interviews · personas · journey mapping · wireframing · usability testing · AI assisted workflows
Figma for wireframes, prototype communication, and handoff.

FOUNDER EXPERIENCE

Thirteen years making services hold together.

KONDUKO AB · 2012 TO 2025

Founder & CEO

Built and led a specialist healthcare staffing company serving Swedish public healthcare. Designed the operating system connecting procurement, physician availability, contracts, schedules, invoicing, and quality control.

25+	140+	All regions	ISO 9001 & 14001
public procurement contracts	physicians on parallel assignments	framework coverage in Sweden	certified operations

Aggregate estimated value of awarded frameworks was SEK 1.5B+. These are procurement estimates, not guaranteed spend and not company revenue. Actual placements depended on regional demand and physician availability.

NIYACARE · 2011 TO PRESENT

Founder

A personal assistance company built around matching people with assistants they can rely on. Responsible for understanding individual needs, service quality, and daily operations.

It is where I learned what autonomy and trust actually require from a service. These are not abstract values. A person depends on them every day.

ABOUT

Research, product thinking, and experience building services people can trust.

Before healthcare, I spent thirteen years in visual communication across design, project coordination, branding, packaging, and client work. I do not present that as a current design practice; it is the background that taught me to brief clearly and read a layout quickly.

EDUCATION		LANGUAGES	
Product Manager · Hyper Island	Current	Greek	Native
UX Design · Medieinstitutet	2026	English	Fluent
Graphic Design · IIEK Technografiko, Athens	1996	Swedish	Fluent
		German	Basic
